Ideal for the gentle blending of powders, granules and fragile materials.

Low speed tumbling action also suited to blending very dense materials.

Using our Winkworth Double Cone blender has reduced the time taken to change batches. There is virtually total discharge, which coupled with the easy access and cleaning, makes this an effective and productive addition to our process facilities.

The gentle mixing action and low speed tumbling make this the ideal blender for:

- Blending
- Vacuum drying
- Pasteurising
- Sterilising
- Nutraceuticals
- Pigments
- Detergents
- Breakfast cereals
- Ceramic powders
- Vitamins and minerals
- Food
- Spices
- Herbs
- Plastic granules
- Metal powders
- Agrochemicals
- Pharmaceuticals
- Plastic powders

At **Winkworth** we design each machine to suit your specific needs. The abbreviated option chart (above) is a guide to assist with developing the specification of your machine. To get your project started please call our sales team who will be delighted to help you.

**Winkworth** are application specialists in the complex and challenging world of mixing. Since 1924, years of experience, knowledge and client feedback have enabled **Winkworth** to design and manufacture bespoke mixing machinery for almost every mixing need.

**Winkworth’s** current range includes the expertise and products originating from BPT Skerman and Premier Colloid Mills. For high shear in-line mixing we offer Ystral products and for low shear we have the Lindor “gentle touch” rotary drum blenders.

This complements the extensive range of proprietary mixer designs which are extensively used across all industries for mixing stiff gums, pastes, powders, liquids, etc, most of which are available at our Mixing Test Centre at our Basingstoke HQ.
