Winkworth Machinery Ltd
Mixer House
Stroudley Road, Basingstoke
Hampshire RG24 8FW

Ideal for melting solid fats into a liquid form.
Unattended melting – low cost operation.

The **Winkworth** Melter reduces the time from cold to useable melted product. It efficiently allows unattended melting to achieve a consistent condition and hence is a low cost solution to pre-conditioning block products for onward processing.

**Winkworth** MV mixers are used in a wide range of industries and applications including:

- Lards
- Butter
- Reclams
- Candle waxes
- Chocolates
- Waxes
- Gums
- Vegetable oils - Heating
- Margarines
- Ghee
- Sugar solutions
- Cocoa
- Rework
- Paraffin waxes

---

Winkworth are application specialists in the complex and challenging world of mixing. Since 1924, years of experience, knowledge and client feedback have enabled Winkworth to design and manufacture bespoke mixing machinery for almost every mixing need.

Winkworth's current range includes the expertise and products originating from BPT Skerman and Premier Colloid Mills. For high shear in-line mixing we offer Ystral products and for low shear we have the Lindor “gentle touch” rotary drum blenders.

This complements the extensive range of proprietary mixer designs which are extensively used across all industries for mixing stiff gums, pastes, powders, liquids, etc, most of which are available at our Mixing Test Centre at our Basingstoke HQ.
