At **Winkworth** we design each machine to suit your specific needs. The abbreviated option chart (above) is a guide to assist with developing the specification of your machine. To get your project started please call our sales team who will be delighted to help you.

Winkworth are application specialists in the complex and challenging world of mixing. Since 1924, years of experience, knowledge and client feedback have enabled **Winkworth** to design and manufacture bespoke mixing machinery for almost every mixing need.

Winkworth's current range includes the expertise and products originating from BPT Skerman and Premier Colloid Mills. For high shear in-line mixing we offer Ystral products and for low shear we have the Lindor "gentle touch" rotary drum blenders.

This complements the extensive range of proprietary mixer designs which are extensively used across all industries for mixing stiff gums, pastes, powders, liquids, etc, most of which are available at our Mixing Test Centre at our Basingstoke HQ.
